

Monochrome Bottom Brackets

Shockcraft now has the complete range of threaded Bottom Brackets for MTB and Road - fully servicable to fit all common road and mountain cranksets. From parts supply to a complete BB service.

The range of Shockcraft's own Monochrome bottom brackets is continually expanding. In addition to the extremely well received original MCEBB-001 in black (to fit Shimano HT2, Raceface X-type & FSA), we now have models to fit Road Shimano HT2 and Truvativ GXP cranksets. All use the same reliable and replaceable bearings.

MCEBB-201 Road (left) MCEBB-101 MTB (right), MCEBB-201 Stepped (centre)

The Road BB's for HT2 are MCEBB-101 and feature the same cups as our MCEBB-001 but with narrower spacers and centre-sleeve. We offer these BB's in black, red and blue. Gold is coming soon. Our MCEBB-201 Stepped BB is compatible with Truvativ GXP cranksets. It is anodised pewter and runs exactly the same bearings and shields as all our Monochrome BB's, complete with a 6 month no-questions-asked bearing warranty.

Monochrome MCEBB-001 with CNC Storm Drains

Bearing and Top Hat kit for all MC BB's

Monochrome BB's are fully servicable. Shockcraft has every spare part and a wide range of bearing options, including 19 & 22 mm BMX bearings, Enduro bearings, ceramic hybrids and soon stainless steel.
