Custom Made Parts

Made by us or for us; solutions for those times when the parts you have just won't fit.

Rear Axles & Adapters

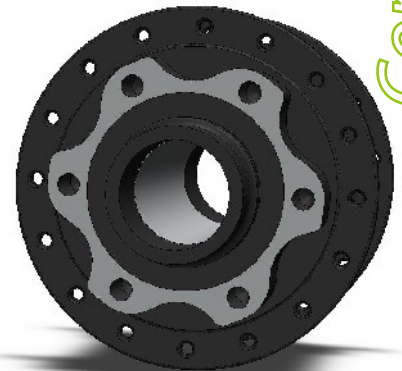

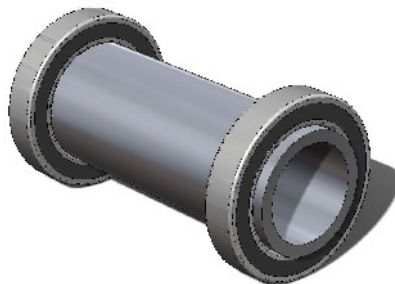

Ever need to fit a 12mm through axle wheel onto a frame with QR dropouts? We have the solution right here:

Need a custom axle? We do those too.

How about a 20mm hub that always drops it's spacer, making it a pain to get the front axle back in?

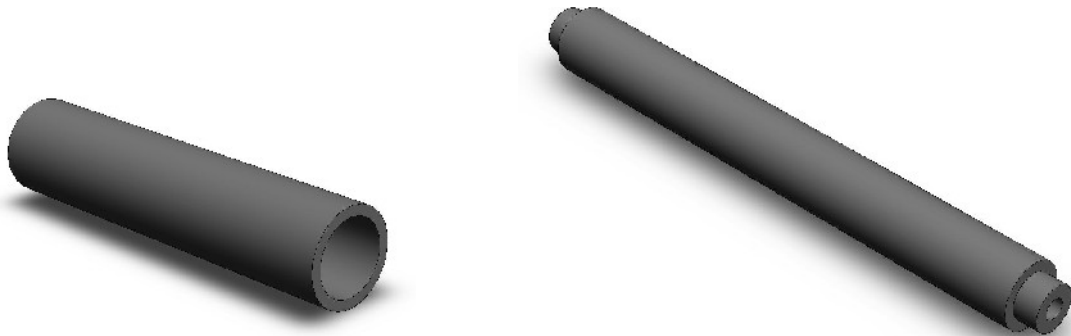

We have custom spacer and bearing packages to sort that out as well.

shockcraft

Travel Spacers to protect your frame and forks while the wheels aren't in:

Rear shock hardware using DU bushings, IGUS bushings or Roller Bearings. These can be offset for minor geometry correction.

Our small CNC mill lets us cut shapes that would be a mission by hand. Manitou RTWD spanner below.
